

What You Should Know

As with many students, this is probably your first experience interviewing at a professional site. With this in mind, the following will aide you in your search:

1. Call your sites 4-6 weeks in advance in order to determine which site best meets your needs. When a site is viable, call to schedule a mutually convenient interview.
2. Bring a copy of your resume to the interview.

Prior To Your Interview:

1. Visit your site's website so as to be well-informed for your interview, and read about their mission and their clientele.
2. Prepare your resume by accentuating your courses or past experience that may be relevant to the site's operation.
3. Come to the interview after a good night's sleep and conduct yourself in a professional manner.
