

Approved lower-division (or equivalent) psychology coursework

- PSYC 101 Introductory Psychology (3)
- PSYC 201 Elementary Statistics (3)
- PSYC 202 Research Methods in Psychology (3)

Approved upper division (or equivalent) psychology coursework

- PSYC 341 Abnormal Psychology
 - PSYC 461 Psychological Testing
 - PSYC 465 Advanced Statistics
-
- Psychopharmacology is required by the State of California for MFT and LPCC licensure. Psychopharmacology has a prerequisite of Biopsychology (PSYC 306). It is advisable to complete Biopsychology or its equivalent (e.g., Brain & Behavior, Physiological Psychology) prior to entering the M.S. program. Students who have not taken Biopsychology may audit PSYC 306 prior to entering or during the program.
 - Students can complete PSYC 461 Psychological Testing and PSYC 465 Advanced Statistics after admission to the program, although this may delay graduation. Because Psychological Testing and Advanced Statistics are prerequisites used for classified standing, they must be passed with a grade of B- or better.
